Game Title: OriPath

Lishkevich Ilya

Genre: 3D / 2.5D Atmospheric Puzzle-Platformer

Target Platform: Mobile (Android & iOS)

Screen Orientation: Landscape (1920 × 1080 reference resolution, canvas_items stretch mode, expand aspect)

Guide a lost boy through monochrome surreal dreamscapes and dangerous night streets by rotating perspective, dodging obstacles, and folding paper origami memories to find the way home.

Core Loop (3–4 steps)

1. Explore & Rotate: Move through 2.5D and 3D stages using the virtual joystick and rotate camera perspective (Q/E or touch buttons) to reveal hidden paths.
2. Platform & Avoid Hazards: Jump over spikes, falling platforms, and speeding street cars while managing 3 health points (♥ ♥ ♥).
3. Collect Objectives: Gather key fragments (2/2) in the Dream stage or paper origami cranes (3/3) on the Street stage.
4. Unlock Portal & Progress: Open the exit portal to transition to the next chapter.

Controls (Touch Gestures)

- Virtual Joystick (Bottom-Left): Continuous 360° / horizontal movement with deadzone (0.18).
- Jump Button (Bottom-Right): Tap to jump (JUMP).

Context Action Buttons (Bottom-Right):

- Chapter 1 (2.5D Dream): Rotate camera left/right (↺ / ↻) and reset pushable box (↺).
- Chapter 2 (3D Street): Hold RUN button to sprint across traffic lanes.
- Pause Button (Top-Right): Tap II inside the safe area to open the Pause menu.

Art Style & References

Visual Style: High-contrast monochrome PSX/retro dithered aesthetic (world_psx.gdshader with Bayer 4×4 dithering and scanlines) combined with hand-drawn ink outlines (ink_outline.gdshader & drawn_surface.gdshader).

Visual References (2–3 games): Limbo (monochrome contrast & silhouettes), Fez (2.5D orthographic camera rotation puzzles), Omori (hand-drawn surreal dream vs. reality contrast).

MVP (Weeks 10–13):

- Complete playable transition between Chapter 1 (2.5D Dream puzzle) and Chapter 2 (3D Street runner/platformer).
- Full mobile touch HUD with SafeArea adaptation for 16:9 phones, 19.5:9 notch phones, and 4:3 tablets.
- Working health, damage, respawn, settings persistence (user://settings.cfg), and audio feedback.

Stretch Goals (Weeks 14–15):

- Chapter 3 boss/finale stage with gravity-inversion puzzles.
- Haptic vibration feedback on damage and key collection on Android/iOS.
- Collectible gallery and speedrun timer per chapter.

Milestone Plan (Weeks 10–14):

- Week 10: Finalize core mobile touch controls, camera rotation smoothing, and Chapter 1 puzzle mechanics.
- Week 11: Complete Chapter 2 (Street) obstacle spawning, car hazards, and origami collection flow.
- Week 12: Polish shaders (PSX dithering + ink outline performance on Mobile renderer) and sound design.
- Week 13: Playtesting on multiple aspect ratios (16:9, 19.5:9, 4:3), bug fixing, and UI ergonomics tuning.
- Week 14: Final Android APK build, performance optimization (60 FPS target), and release presentation.

Asset Sources

- Custom / Original: 3D character mesh & animations (core/player/boy.glb), custom Godot shaders (world_psx.gdshader, ink_outline.gdshader, drawn_surface.gdshader), level geometry (world_25d.tscn, world_3.tscn), CRT monitor UI art (assets/menu/monitor.png).
- Fonts & Audio: Custom pixel/display fonts (FirstTimeWriting!.ttf, pobeda-bold1.ttf, RuneScape-ENA.ttf) and royalty-free ambient music (melody.mp3) & retro SFX (coin.wav, noise.wav, step.mp3).
